Lahore, Pakistan

Course Pre-requisite	12-14 Years of Education No Experience Required
Course Duration	02 Months (Weekend + Regular Classes) 135 Credit Hours
Instructor Name	Mr. Muhammad Arif Mr. Imran Sarvar Khan

1. Course Objective

The Construction Contract Management course aims to equip participants with a thorough understanding of contract principles and their application in construction projects. Participants will enhance their negotiation, communication, and conflict resolution skills while ensuring legal compliance and ethical practices. The course focuses on risk mitigation, transparent communication, and effective financial management. By fostering cross-disciplinary collaboration and adaptability to industry changes, the course prepares participants for career advancement and personal growth within the construction sector.

2. Course Delivery

- Classroom delivery at PMLH classroom
- Online delivery by using “Zoom” or “Google Classroom” application with real life project examples and hand on practice on contract documents

3. Course Curriculum

Lecture	Topic	Detail
1	Introduction	- Brief overview of the importance of construction contract management. - Mention the diverse skills and knowledge required for effective contract management.
2	Contract Law and Principles	- Definition of contract law and its significance in construction projects. - Types of contracts commonly used in construction. - Key contract principles: offer, acceptance, consideration, and more.
3	Contract Documents	- Importance of contract documents in guiding project execution. - Types of contract documents: specifications, drawings, scope of work, and more.

		• Role of each document in ensuring project clarity and success.
4	Risk Management	• Explanation of risk management in construction contracts. • Identification of potential risks and their impact on projects. • Strategies for mitigating risks, including insurance and bonding.
5	Procurement and Tendering	• Overview of procurement methods: competitive bidding, negotiated contracts, design-build. • Steps involved in the tendering process. • Selection criteria for contractors and suppliers.
6	Contract Negotiation	• Importance of effective negotiation in contract management. • Key contract terms: scope changes, pricing, payment terms, etc. • Techniques for successful negotiation.
7	Contract Administration	• Role of contract administrators in project execution. • Managing contract compliance, change orders, and variations. • Handling claims and disputes effectively.
8	Dispute Resolution	• Explanation of dispute resolution methods: mediation, arbitration, litigation. • Importance of conflict management in construction contracts. • Strategies for avoiding and resolving disputes.
9	Project Controls and Monitoring	• Introduction to project controls: tracking progress, cost control, and schedule adherence. • Reporting mechanisms and key performance indicators (KPIs). • Ensuring project success through effective monitoring.
10	Ethics and Professional Responsibility	• Discussion on ethical considerations in contract management. • Maintaining professionalism, accountability, and transparency. • Handling conflicts of interest and maintaining confidentiality.
11	Communication and Documentation	• Importance of clear communication in contract management. • Effective communication with stakeholders, contractors, and project teams. • Managing project documentation and correspondence.

12	Quality Control and Assurance	• Ensuring adherence to quality standards and specifications. • Implementation of quality control processes and inspections. • Delivering projects that meet or exceed quality expectations.
13	Legal and Regulatory Compliance	• Staying updated on relevant laws, regulations, and codes. • Meeting environmental, safety, and legal requirements. • Implications of non-compliance on project outcomes.
14	Payment and Financial Management	• Managing payment processes, progress billing, and retention. • Importance of budget management in contract execution. • Ensuring financial transparency and accountability.
15	International Contract Management	• Addressing cross-border considerations: cultural, legal, and logistical differences. • Navigating international regulations and standards. • Strategies for successful global contract management.

4. Expected Audience

The targeted audience for a professional certification or training program in Construction Contract Management is broad and encompasses individuals from various roles within the construction industry. The program is designed to provide knowledge and skills relevant to effectively managing contracts in construction projects. The audience may include:

The typical users are:
