Lahore, Pakistan

Course Pre-requisite	12-14 Years of Education No Experience Required
Course Duration	02 Months (Weekend + Regular Classes) 135 Credit Hours
Instructor Name	Miss. Ayesha Shahid

1. Course Objective

The project manager's most crucial ally when it comes to planning, scheduling, and monitoring the progress is Microsoft Project Software. In other words, MS Project is one of the tools that business owners and project managers cannot live without. Thus, earning a Microsoft Project certification is also crucial. It provides a single solution for managing projects of any size and adjusts to different levels of project complexity. It covers the fundamentals and intermediate features of Microsoft Project, as well as some advanced features.

It is a dedicated two-month training module in a structured and professional manner allow candidates to demonstrate following knowledge and skills:

- Discover step-by-step how to develop your project plans in MS Project.
- Before beginning to construct your project plan in MS Project, find out what you should have.
- See examples of how to use MS Project to create tasks, assign resources, establish baselines, do reporting, and more.
- How to deal with expenses, deadlines, and schedule conflicts
- By addressing utilization issues, you can save your projects thousands of dollars.
- An actual project is used to demonstrate how to construct a project plan, Project file safety, storage, and protection.

Enrolling in this course will assist you in comprehending MS Project basic and advance features and functionality so that you can apply them to your company's project management operations. You'll learn how to manage projects on time and on budget in order to get the most out of your capital and resource expenditures.

By taking this course, you will have a better understanding of MS Project's resources and portfolio functionality, allowing you to make better project management decisions. You'll learn how to efficiently manage resources in order to maximize investment, as well as how to choose and prioritize projects in order to align strategy, execution, and results.

2. Course Delivery

- a) Classroom delivery at PMLH classroom
- b) Online delivery by using "Zoom" application with real life project examples and hand on practice on MS Project.
